

28 February 1966

MEMORANDUM FOR: Chief, Biographic Register

SUBJECT : Personnel Requirements for Intelligence
on Communist China

1. In order to plan more effectively for long range personnel requirements on Communist China, more information is needed as to what kind of professional people are needed, what degree of area and language knowledge, what special academic disciplines, such as political science or geography, may be wanted, and at what level, AB, MA, or Phd.

2. Moreover, early this spring the Agency will have teams made up of a personnel recruiter and an analyst knowledgeable on Communist China visiting those universities with China study programs as one part of the effort to examine and evaluate their programs, to stimulate enrollment in the programs, to present our, and other intelligence agencies' projected personnel requirements and to explore ways of attracting graduates to CIA and government service. At the same time our own Office of Training is considering certain courses of action in this area, especially increased language training. For all the above we obviously need as detailed personnel requirements as can be developed.

3. So that the personnel requirements for each of the five years, 1968 through 1972 may be projected more accurately, please complete the attached form, and return it to AS/CR by COB 7 March 1966.
